FUJITSU

Simplify your conference and meeting rooms

Launch a call on the display from your own device

With Fujitsu Collaboration Board, the only thing you need to start a video call on the main screen is your phone.

Wirelessly connect your phone to the screen, launch the call and that's it. You don't have to touch the Collaboration Board, tap on a tabletop console or even get off your seat.

Totally Locked down, Safe and Secure

You can switch between Android and Windows or remove the Android entirely. Keep your setup safe from curious by enabling Kiosk mode and limiting access to Windows desktop.

Collaboration Board keeps what you do on a meeting room screen private and secure. One tap clears your footprint, closing apps and clearing any browsing history.

Get meetings started rapidly

Collaboration Board's smart room calendar picks up video calls and meetings to save precious time. It supports most popular UC apps like Zoom, MS Teams, Google Meet, WebEx, GoToMeeting and Lifesize.

BlueJeans

Fujitsu Interactive Panel is designed to maximize flexibility in meeting through open sharing. It allows for seamless team collaboration, ideas exchange and information sharing then turning your work from abstract to real.

Multi-Panel Multi-Device Synchronisation

Combining two Panels together, users can seamlessly double the working space and develop borderless ideas in the same room or even in a different room via the network.

Interactive Experience

Supports up to 20-point touch and pen-on-paper writing experience, enabling team members to annotate or draw on the screen with their fingers or pen styluses simultaneously.

Pen Tip Detection Technology

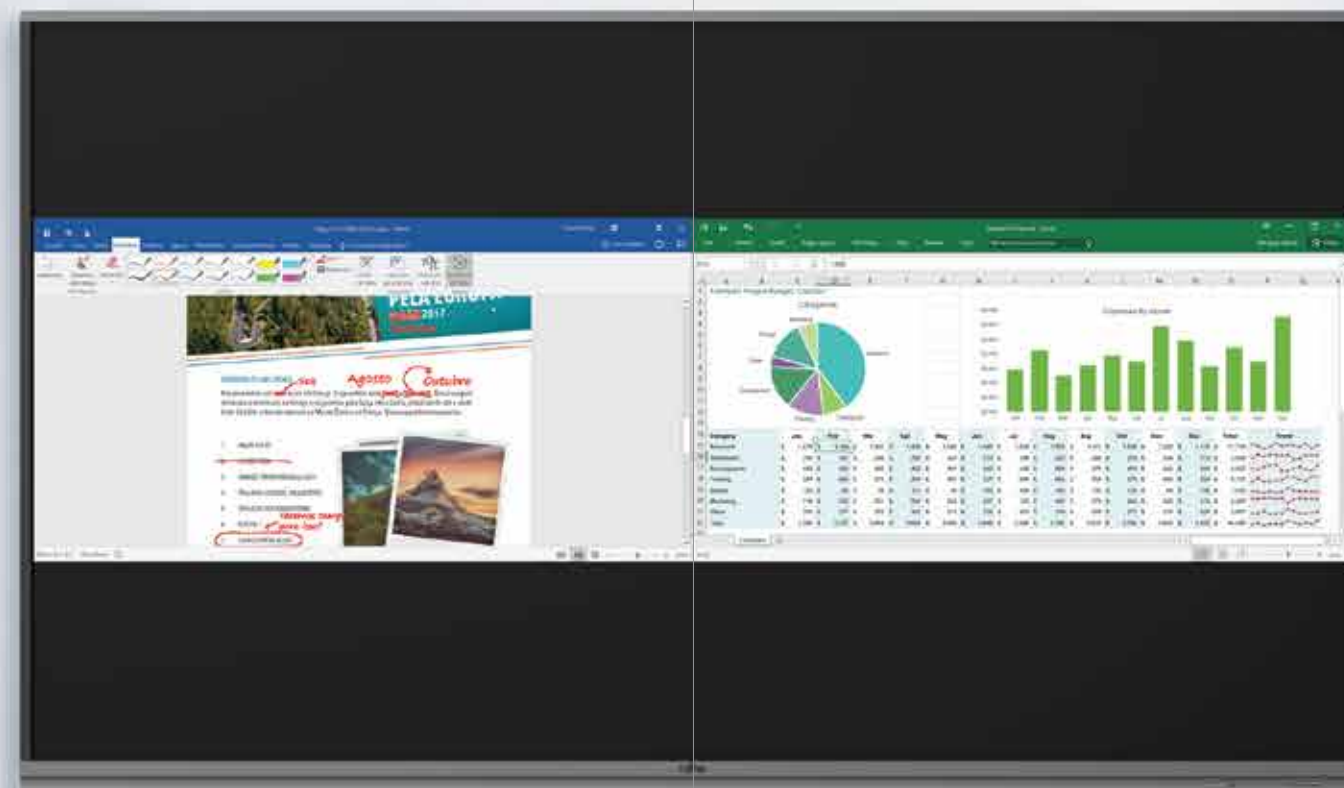

Automatically detect pen diameter and write simultaneously with different colours and thickness, making team collaboration effortless.

Simple and Smart Wireless Presentation

Project your content wirelessly from any device to your meeting room display. Collaborate in real time with touchback, without moving back and forth during the presentation.

One-to-Many Screen Sharing

No limits to presenting at a town hall. Every audience member will be able to see the display in real time on their own devices.

Work with Confidence Anywhere LIFEBOOK U9311X

Work with confidence anywhere

Weighing in at just over 1 kg and only 16.9 mm thin, the FUJITSU Tablet LIFEBOOK U9311X is a 360° foldable, 2-in-1 providing ultimate flexibility.
