

IT Security in Post-pandemic Era

28 March 2023

Are we going back to Old Normal?

Remote Work

Bring Your Own Device (BYOD)
Virtual Private Network (VPN)

Community Service

Mobile Device
Mobile Applications

E-Services

Online Enrollment
Digital Payment

IT Security Concern in Post-pandemic Era

E-Services

More Sensitive Data to Handle
(including Service Client and e-Payment Information)

Higher Exposure in the Internet
and the General Public

Remote Work
BYOD
Mobile Applications

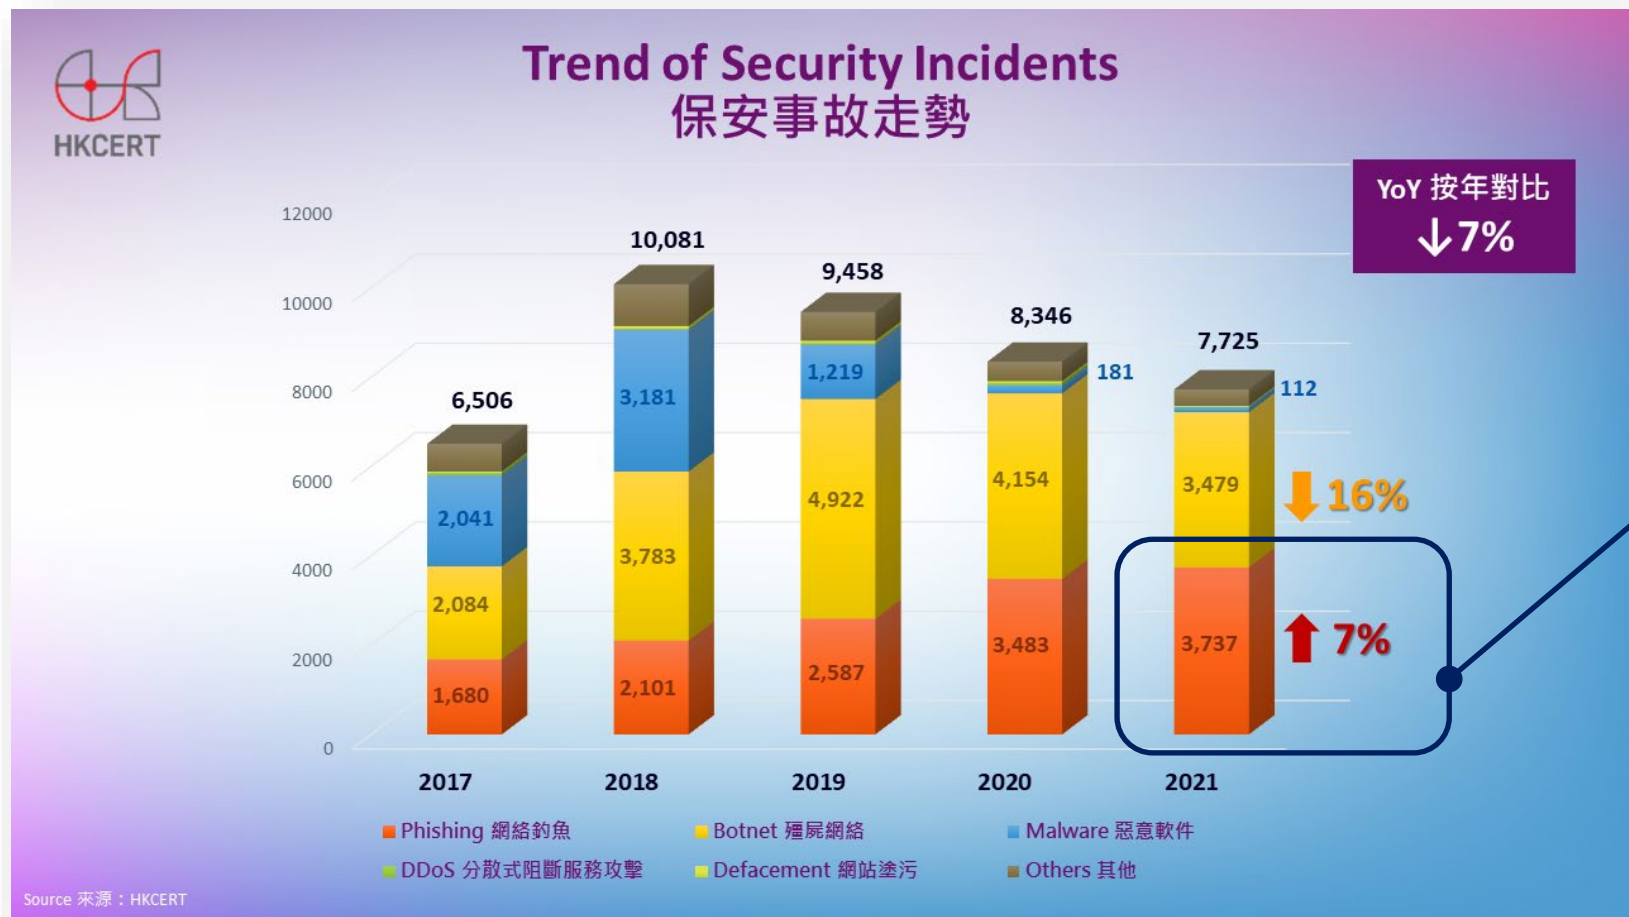

Lower Security Level
for Personal Device/ Home Network

Higher Risk of Data Breach/ Data Loss
for Mobile Applications

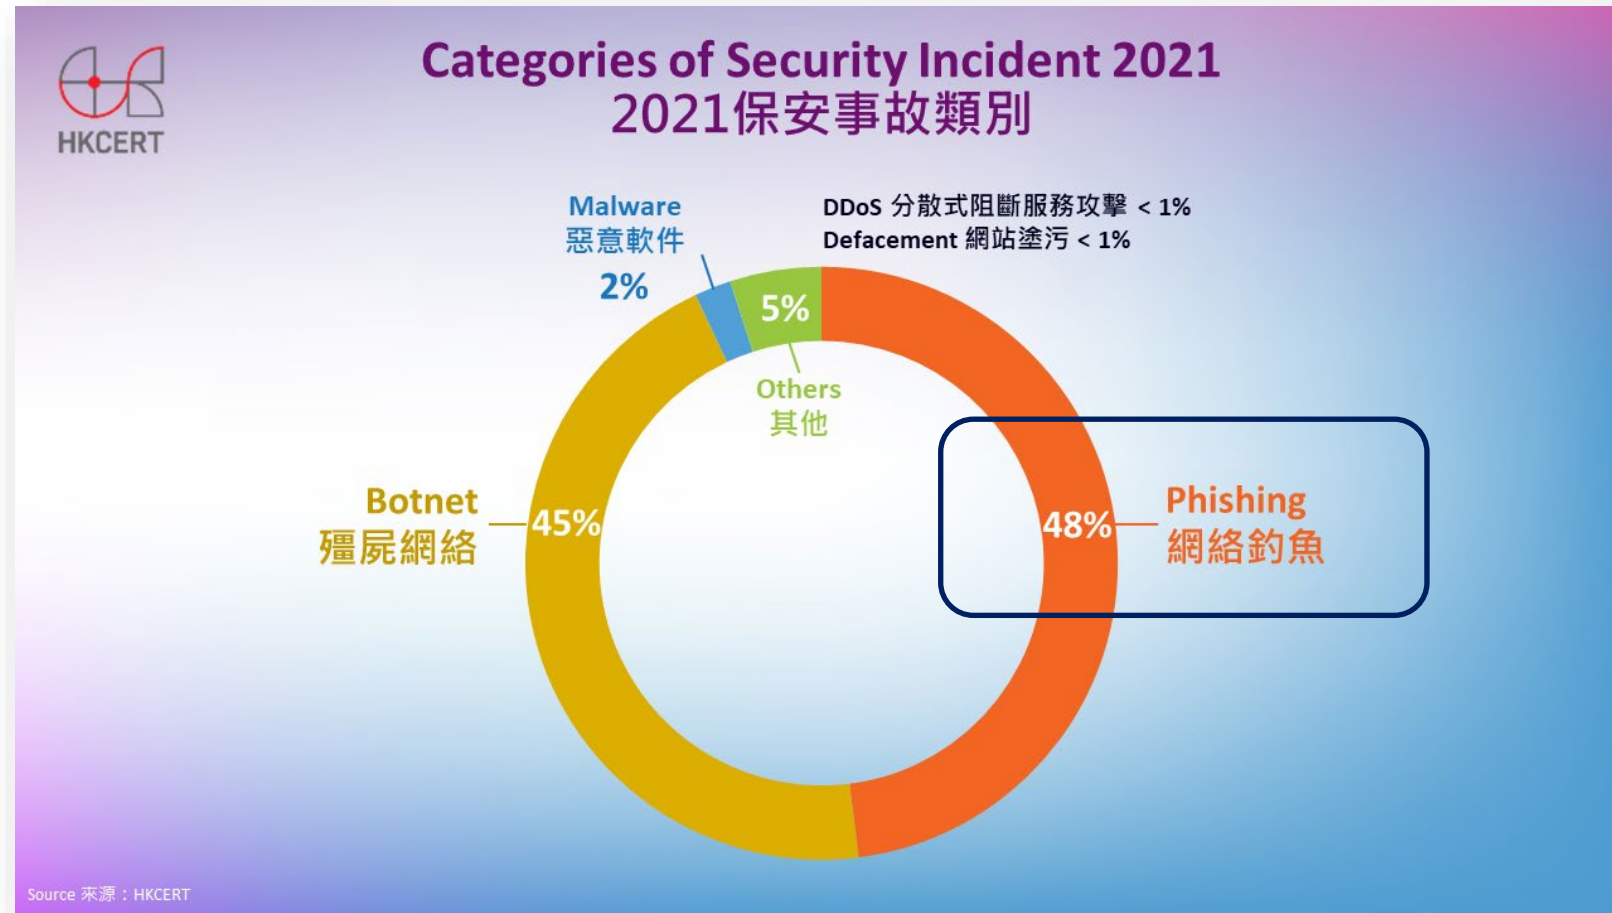

Cyber-attack Trend

Cyber-attack through
Phishing has been increasing
